TOUGH, POWERFUL, RELIABLE

The TB295W features a wheeled undercarriage for greater versatility and mobility. It is well suited for bridge, highway, and roadwork, and with a top speed of 30 km/h it can travel between job sites quickly and efficiently for greater productivity

A 85 kW engine powers the TB295W and it meets the very latest EU emissions standards. An electronic dial throttle allows the operator to set the engine speed to their desired level, and auto idle helps to reduce fuel consumption by returning the engine to low idle when the machine is inactive for several seconds.

Once input from the operator is received the engine will return to the operator's desired speed.

An enclosed cabin provides heat, automatic climate controlled air conditioner, AM/FM Bluetooth radio, retractable front window, and skylight with sunshade. The automotive styled interior features intuitive controls, ample space, improved comfort, and visibility. While the deluxe, high back heated air suspension seat provides multiple adjustments, for height, weight, fore and aft, and tilt placing the operator in the optimal position for both driving and excavating.

Spacious Operator's Station with Easy to Reach Controls and Switches.
