Known for its dependability and outstanding performance in the field, the TB260 offers lockable service access panels, automotive styled interior, and a smooth and powerful hydraulic system. Primary and secondary auxiliary hydraulic circuits and a high capacity hydraulic system make the TB260 an excellent attachment platform.

An optional pattern change valve is located under the side cover and allows the operator to choose their preferred operational control pattern before entering the machine.

Once in the cabin the operator will enjoy a deluxe high back suspension seat, a spacious interior that is comfortable and includes conveniently positioned rocker switches to control additional functions, and the dial throttle allows the operator to control engine speed effortlessly.

Additional features include automatic idle, heavy duty cooling module, and a large wraparound counterweight that protects engine components from damage.

Large lockable service hoods provide vandalism protection and outstanding maintenance access.
